VOL. I WEEKDAY EDITION

THE SPACEX DISPATCH

Weekday briefing on SpaceX launches, Starlink, AI and the SPCX stock

TUESDAY, OCTOBER 27, 2026 MARKET DATA AS OF MON OCT 26 CLOSE

THE MORNING PICTURE

Starlink Mobile goes live in Brazil

"Starlink Mobile is now live in Brazil with @vivobr! 50M customers can use apps and messaging in cellular dead zones — with 7M phones already connected. This is the first nationwide service to cover the entire country," Starlink posted at 11:53 a.m. EDT Monday. Michael Nicolls shared the announcement: "Starlink Mobile in Brazil with @vivobr !"

Vivo calls the service Vivo Satélite. Customers on eligible plans can use messaging apps, maps and the carrier's support channel where there is no tower signal, without the data counting against their monthly allowance, and the service is free for a limited time, O Globo reported. Video calls and general web browsing stay blocked. No sign-up or app is needed: the phone must support LTE or 5G, run the latest software and have data roaming switched on, and it needs a clear view of the sky.

The link runs in the 2.5 GHz band at up to 100 watts of transmit power. Brazil's telecom regulator, Anatel, set up a supervised test regime in June, and the authorization has been renewed to April 22, 2029, with commercial use allowed under the experimental rules (O Globo).

I · HUMAN SPACEFLIGHT & LAUNCHES

Starlink 15-16 flies; Ship 42 fires

Falcon 9 lifted off from Vandenberg early Tuesday, and Starbase ran a ship static fire and a catch rehearsal on Monday night.

A Falcon 9 lifts off from Space Launch Complex 4E at Vandenberg Space Force Base with NASA's SWOT satellite on Dec. 16, 2022. Starlink 15-16 flew from the same pad on Tuesday.

PHOTO: NASA/KEEGAN BARBER · PUBLIC DOMAIN

Falcon 9 lifted off from Vandenberg Space Force Base at 3:25 a.m. EDT Tuesday with the Starlink 15-16 mission, "A post-midnight takeoff," Spaceflight Now posted. The booster, B1082, was flying for the 26th time, and it landed after the launch (NASASpaceflight, touchdown). At 4:29 a.m. EDT SpaceX posted: "Deployment of 27 @Starlink satellites confirmed."

Ship 42 and Ship 43

At Starbase, Texas, the ship for Flight 15 ran an engine test on Monday night. "Ship 42 is setting up for a single-engine static fire shortly. Ship 43 is practising what it's like to be caught," NASASpaceflight posted at 9:58 p.m. EDT, and at 10:18 p.m.: "Starship Flight 15: Ship 42 conducts a single-engine static fire test at SpaceX Massey's" (post).

Ship 43, assigned to Flight 16, had rolled to Pad 2 earlier on Monday, "likely for catch testing ahead of Flight 15," wvmattz posted. By 2:02 a.m. EDT Tuesday it was "back on the ground after catch-related testing similar to what Ship 42 did," efraser77 posted.

QUICK HIT

Raptor thrust. "Raptor 4 will be 300 tons of thrust at sea level and hopefully about the same mass," Elon Musk posted at 9:58 a.m. EDT Monday. Later he added: "We can only reliably get to around 230 t-F with Raptor 3."

II · UPCOMING FLIGHTS

A Space Force mission joins the list

Every SpaceX launch on the books for the next five weeks, with how firm each date is and where it comes from. Times are Eastern: EDT through November 1, EST after.

DATE / TIME (EDT/EST)	VEHICLE	MISSION	PAD	STATUS	SOURCES
Fri Oct 30, 12:02 a.m. EDT	Falcon 9	Starlink 15-18, 27 V2 Mini satellites; landing on Of Course I Still Love You	SLC-4E, Vandenberg	Tentative	Spaceflight Now; Launch Library 2
Sun Nov 1, 8:56 p.m. EST	Falcon 9	USSF-432, U.S. Space Force. **New.** Four-hour window; backup Mon Nov 2, 8:42 p.m. EST; booster on its eighth flight, landing on Of Course I Still Love You	SLC-4E, Vandenberg	Confirmed	SpaceX mission page; Launch Library 2
Thu Nov 5, 12:14 a.m. EST	Falcon 9	Starlink 15-21, 27 V2 Mini satellites; booster B1103, seventh flight	SLC-4E, Vandenberg	Tentative	Launch Library 2; Spaceflight Now
November	Falcon 9	NROL-195, National Reconnaissance Office. **Moved** from Thu Nov 5, 5:34 p.m. EST; no reason given	SLC-4E, Vandenberg	Preliminary	Launch Library 2
November	Starship	Flight 15, Ship 42 and Booster 22; ship static fire Oct 26	Pad 2, Starbase, Texas	Preliminary	NASASpaceflight; Spaceflight News (NET Nov 8, unofficial)
November	Falcon 9	Cygnus NG-25 cargo to the ISS	SLC-40, Cape Canaveral	Preliminary	Launch Library 2
Later	Starship	Flight 16, Ship 43; first Starship launch from Florida	LC-39A, Kennedy	Preliminary	NASASpaceflight (unofficial)

Status: Confirmed means the operator or NASA has announced the date and time. Tentative means a specific date appears in published schedules but has not been confirmed by SpaceX or its customer. Preliminary means only a no-earlier-than (NET) date or month, or an unofficial target. Changes since Monday's issue: Starlink 15-16, listed for 12:45 a.m. Tuesday, launched at 3:25 a.m. EDT. USSF-432 is new: SpaceX is targeting Sunday, November 1, with the four-hour window opening at 8:56 p.m. EST, and says residents of Santa Barbara, San Luis Obispo and Ventura counties may hear sonic booms. NROL-195, listed for November 5, now shows only "November" in Launch Library 2, with no reason given. Cygnus NG-25, listed as NET November 30, also now shows only November. Pads: Space Launch Complex 4 East (SLC-4E), Space Launch Complex 40 (SLC-40), Launch Complex 39A (LC-39A). ISS: International Space Station.

III · STARLINK

Verizon's chief: "no shortcut"

Verizon's CEO put a four-to-six-year, $300 billion to $500 billion price on a Starlink Mobile network in the U.S.; Musk answered "2 or 3 years."

A train of Starlink satellites crosses the night sky over the town hall in Tübingen, Germany, on April 24, 2020.
PHOTO: DKTUE / WIKIMEDIA COMMONS · CC0 (CROPPED)

"There is no magic wand. There's no secret sauce. There's no shortcut," Verizon CEO Daniel Schulman told analysts on the company's third-quarter earnings call on Monday, Yahoo Finance reported. "Their service just can't compete with a terrestrial network in suburban and urban areas, where like 98% of our revenues are," he said. "We're somewhere between 100 to 1000 times more efficient than they are."

Schulman estimated an all-in cost of $300 billion to $500 billion over the next six to seven years, assuming a buildout of at least four to six years. Replying to a post by Sawyer Merritt that summarized the remarks, Musk wrote at 1:40 p.m. EDT: "Will take 2 or 3 years." He did not comment on the cost figures.

SpaceX is in talks with telecom infrastructure companies, reportedly including Crown Castle, for access to at least 80,000 U.S. cell sites, Bloomberg reported on Thursday. Earlier this month SpaceX agreed to buy up to 14 megahertz of paired low-band spectrum in the 800 MHz range, a deal reported at about $8 billion that still needs Federal Communications Commission (FCC) approval. Of a SpaceX network built to that scale, Schulman said: "Frankly, at that point, I welcome the opportunity to compete against them."

Carriers lobby the FCC

Verizon, AT&T and T-Mobile, with the wireless trade association CTIA, are lobbying the FCC to keep current cell-service spectrum rules and oppose changes that would make it easier for satellite companies such as SpaceX to offer cellular service, Yahoo Finance reported. "The Commission's buildout decisions have real consequences for consumers who rely on ever-increasing wireless capacity to access the modern

economy and support their day-to-day living," CTIA wrote in a letter filed Thursday.

Their proposals include blocking satellite providers from 5G frequencies used for wireless service and letting wireless providers keep control of licensed spectrum. At Wednesday's AT&T earnings call, Chief Executive John Stankey said of a new network: "It's not something that gets done overnight." The FCC's open meeting on Thursday includes votes on more spectrum for Supplemental Coverage from Space (Broadband Breakfast).

IV · AI & COMPUTE

"Probability of 20GW is currently rising"

Musk recast his compute forecast, and agreed with Michael Dell's description of him as a customer.

Replying to Peter Diamandis, who had written that Musk "says he could bring 20 gigawatts of compute online next year," Musk posted at 12:27 p.m. EDT Monday: "I said 20GWs next year is extremely unlikely, just not 0%, whereas the probability was 0% even a few months ago. Probability of 20GW is currently rising with time."

A clip from an interview with Michael Dell, shared by firesidealpha, has Dell calling Musk the "most demanding customer there is," and the interviewer noting that "Dell did half of the servers in the Colossus One AI supercomputer for SpaceX." Musk replied at 12:18 p.m. EDT: "True."

V · FILINGS: SEC, FAA & FCC

No new SEC filings; FCC meets Thursday

The last SEC filing was Monday's 8-K on the GPU lease, and the FCC's open meeting is Thursday.

SEC

None new — No SpaceX filings on EDGAR since the 8-K accepted at 8:00 a.m. EDT Monday, covered in Monday's issue.

FCC

Oct 22 · CTIA letter — Wireless trade group asked the FCC to protect terrestrial licensees' exclusive rights. Yahoo Finance

Oct 29 · Open meeting — Votes on more spectrum for Supplemental Coverage from Space and a proposed 25 MHz auction. Broadband Breakfast

Nov 4 · Surety bond — Due under the October 6 order granting 15,000 Gen2 direct-to-device satellites in part. Exterra

Nov 25 · Space Modernization — Comments due on the further notice of proposed rulemaking (SB Docket No. 25-306); replies Dec 28. Federal Register

FAA

Open · Starbase PEIS — Comments on the Federal Aviation Administration's Programmatic Environmental Impact Statement for more Starship-Super Heavy operations at Starbase (docket FAA-2026-12808) are due November 30. No new FAA notices since. Federal Register

COMING UP

Fri., Oct. 30 · 12:02am EDT Starlink 15-18 from Vandenberg (Spaceflight Now)

Sun., Nov. 1 · 8:56pm EST USSF-432 from Vandenberg (SpaceX)

Thu., Oct. 29 FCC open meeting (Broadband Breakfast)

Takeaways

1. Starlink Mobile is live nationwide in Brazil through Vivo.
2. Starlink 15-16 launched early Tuesday on B1082's 26th flight.
3. Ship 42 completed a single-engine static fire for Flight 15.
4. USSF-432 is set for Sunday from Vandenberg; NROL-195 moved to an open November date.
5. Verizon's CEO priced a U.S. network at $300 billion to $500 billion; Musk said it "Will take 2 or 3 years."
